

Diversity is the hallmark of democracy. to allow the type of ownership you are considering is counter productive to democracy. the argument is put forth that everyone will have the internet or digital radio and tv is ludicrous and elitist, not democratic. Also, local stations will lose impact and control over what is being broadcast. please put the concerns of individuals and democracy above the concerns of commercial interests. we are at a watershed moment in our history. don't turn the corner toward more rights for corporations and less for individuals.
